ABOUT US

Techorbit Trading is a limited liability company that was established and has ventured into the telecom industry. Since its inception in 2005 as an Etisalat channel partner and later in 2010 with the Road and Transport Authority (RTA) as their products distributors in the region. Techorbit is one of the fastest-growing telecom firms in the region as a result of its dedication, technological innovation, and exceptional customer service. Techorbit developed a reputation as one of the top regional distributors of Etisalat products and services with the support of a business model that it developed and improved over an eighteen-year period.

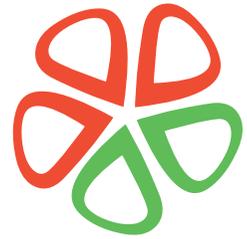

Having launched its IT business about ten years after the company's formation, Techorbit remains one of the strongest IT businesses in the region, with its back office operations located in Kerala, India. We develop our own small- and medium-sized business software as well as high-end ERP solutions that are based on Oracle. We have accomplished a spectrum of IT projects for our esteemed clients, which also include The Al Madina Group of Companies, Dubai Health Authorities (DHA), Al Quoz Mall, Central Mall, Oasis Bakery, as well as many more renowned companies.
